

# MADA THREADED ROD

Technical Data Sheet

TDS-ACC-R54-Rev2 Threaded Rod - 2024

## Product Description

Mada Threaded Rod features threads along the entire length. Threaded rods are used to suspend ceilings with one end fixed to the concrete slab / beams or any other structure with suitable fixings and the other end to the ceiling framework.

## Field of Application

Applicable for ceiling system, cinema system, and other such applications where high tensions are required.

## Manufacturing Standards

In compliance with ASTM A123, ASTM A307 Grade A, ASTM C645 & EN 14195. Specially engineered product for suspension of ceiling system.

## Product Characteristics

Parameters	Details
Material	Galvanized Steel
Thread Type	Coarse Thread
Yield Strength	240MPa - 310MPa
Tensile Strength	340MPa - 420MPa
Diameter (mm)	6, 8, and 10
Length	3000mm

## Handling and Storage

- Products are supplied in pack and sub-pack quantities and should be handled in accordance with the recommendations contained in Health and Safety at Work Principles and Practice.
- Metal products should be stored in an environmentally-friendly area away from airborne contaminants such as acid and salt sprays.
- People with sensitive skin conditions should seek medical advice before prolonged handling of metal products; hands should be washed before eating and for personal hygiene.
- Non-fogging goggles should be worn when cutting metal sections.

## Installation Guidelines

- To be installed along with Mada Drop-In Anchor.
